

Engineering Weekly Sync & Architecture Review

****Date****: September 21, 2026

****Attendees****: Maya Lin, Alex Chen, David Rossi, Priya Sharma

Meeting Objectives

1. Review Project Starlight Q3 milestone progress.
2. Review UI refinement for reference document attachments (zero-footprint dropdown entry).
3. Resolve CoreAudio drift issues on macOS Sonoma / Sequoia.
4. Agree on SQLite ABI regression test suite before next release.

Discussion Topics & Notes

- ****Local Artifacts UI****: Alex demoed the new quiet inline badge row and dropdown entrypoint. No persistent card above notes. Dropzone triggers smoothly on hover.
- ****Audio Synchronization****: David noted 12ms drift during Bluetooth reconnects. Fix is queued for Milestone 2 (Oct 10).
- ****CoreML Whisper Quantization****: Priya tested Q4_0 quantization on M2 Max – 22% memory reduction with zero perceptible WER regression on technical jargon.
- ****Action Items****:
 - [] Maya: Run migration benchmarks on databases with > 500 attachments.
 - [] David: Submit pull request for CoreAudio ring buffer retry handler.
 - [] Alex: Verify keyboard accessibility on the attachments text preview modal.
